Contents

Desks and scholastic furniture that grow with your child

moll represents furniture systems with plenty of options for extension and a high level of functional variety.

In childhood and young adulthood, our furniture systems follow ergonomic guidelines at every stage of the child's individual development, and are planned down to the last detail. Typical moll.

In this product overview you will find a whole range of innovations. Whatever your requirements are, you will find desks, containers, shelves and extremely versatile Additions for your child's favourite spot.

Selection of material / decor

melamine resin-coated chipboard

Choose from five decors with easy-care, strong surfaces that are resilient and long-lasting.

The combination of melamine resin-coated, low emission chipboard (E1, 19 mm) with inserted soft edging and rounded, 2-mm thick edge veneers, high quality metal and plastic components results in furniture that meets the highest requirements for quality and technology.

Maple

Beech

Red beech

Walnut

A different colour every day ...

When buying a moll desk, it is no longer necessary to choose a specific colour - they come with the whole range.

All our desks come with a box of decorative elements in seven colours. The handle profile of the metal drawer (Runner and Runner Compact) directly under the desktop comes with a storage for coloured foils. The colour accents can be changed as desired.

For containers a colour must be chosen.

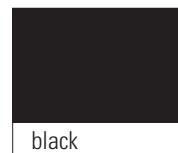

In addition to the chosen colour application you will receive the handles and lockring in neutral grey.

Feet Express 100 and 120

Height adjustment „at the touch of a button“

The “Express” feet have been developed by moll for the quick adjustment of any height on a purely mechanical basis (in 1 second appr. 40 cm).

In order to ensure that the Express height adjustment remains functional and comfortable to use, the maximum additional load (weight of additions used and equipment in/on the desk) is limited to **40 kg**.

Important:
only additions that do not require a supporting foot can be used to extend the table.

Express 100 feet:

Desk height	from 63 - 100 cm
for body height* seated:	from 133 - 210 cm
for body height* standing:	to 165 cm

Express 120 feet:

Desk height	from 73 - 121 cm
for body height* seated:	from 157 - 210 cm
for body height* standing:	to 200 cm

* Figures shown here are recommendations.
 The correct desk height needs to be set individually.

Locking lever

Spring tension control

Only for Additions without supporting foot

Feet / supporting foot Comfort

Height adjustment with a wire rope

moll's patented development facilitates, for the first time ever, the **synchronous - and almost instant! - mechanical adjustment** of the height of the desk and inclusive any Additions that have been linked to the table in a single movement of the hand.

- Easy and uncomplicated to operate - even when sitting
- Patented childproof catch
- Continuous height adjustment
- Feet and supporting feet linked with a transmission gear
- For desk heights from 53 cm to 82 cm
- Ergonomically designed for user heights from 109 - 200 cm

Important:
The Comfort supporting feet can only be combined with the Comfort feet.

While adjusting the height the maximum load is limited to 30 kg.

With the Comfort height adjustment, a simple pull is all that is required to adjust the desk height to the user's body height.

The key for the height adjustment can remain attached to the desk or can also be removed from it.

Height settings
see page 6

The main advantage: **Additions grow with the child**
Thanks to the lift technology, all elements „grow“ with the desk as the height is adjusted, and do not need to be adjusted separately.

Feet / supporting foot Classic

Height adjustment with a hook fitting

- Height adjustment in 10 stages with patented hook-in fitting
- Rotary slide with childproof catch on feet
- For desk heights from 53 cm to 82 cm
- Ergonomically designed for user heights from 109 - 200 cm

Important:

The Classic supporting feet can only be combined with the Classic feet.

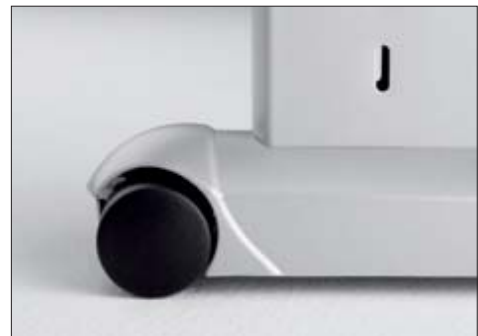

Mount cover
with integrated childproof catch

Measurement scale
helps to set the correct desk height quickly

Adjustable foot plates
balance uneven floors and provide added stability

Mobility with castors on the feet
This facilitates the cleaning of the floor.

Body height	desk height	seat height
↑ ~191 (cm)	↑ 82 (cm*)	↑ 49 - 54 (cm*)
~183	79	47 - 51
~175	75	44 - 48
~167	72	42 - 46
~159	69	40 - 44
~151	66	38 - 42
~143	63	36 - 39
~135	59	32 - 37
~127	56	30 - 34
↓ ~119	↓ 53	↓ 28 - 32

* Settings shown here are recommendations.
The correct desk height needs to be set individually.

Ergonomics

Growing with your child

From primary school to graduation, only scholastic furniture that grows with your child can help them sit and stand in the ergonomically "correct" position during this important period of growth and development.

Adjustable furniture offers plenty of options for adjustment:

- height-adjustable feet
- desktops can be tilted to -30° to bring the work closer to the eye, which encourages a relaxed position
- height-adjustable seat and backrest
- seat depth adjustment

Sitting "properly"

Sitting "properly" is not a science; all you need to do is observe a few basic rules concerning the sitting position and desks in general.

- The lower leg should be vertical to the floor, the thigh horizontal
- The lower arms should be resting on the desktop in a relaxed position
- Desks and scholastic furniture should be height adjustable
- The seat should tilt forward by approx. 2°
- The seat depth should be positioned correctly: the thighs should not be in contact with the front edge of the seat
- The backrest should be adapted to the back and support the lumbar region
- There should be sufficient space for the legs

Innovations

Desktop tilt

All our desks come with a user-friendly tilting function (telescopic arms) on the desktop - to guarantee the ergonomically correct posture when drawing, writing or reading.

The desktops are continuously adjustable up to 30°; adjusting them is child's play, as the adjustment process is assisted by two spiral springs in the desktop. Pulling on the handle under the desktop/drawer lowers it from any position.

Brake function

There are no contact points on the telescopic mount that tilts the desktop, which makes it especially safe. An integrated brake prevents the desktop from falling straight down when it is released. Depending on the load on the desktop, the lowering speed can be set directly on the mount.

Knee and lower leg protection

All our desks, containers and Additions are specially constructed for children and young adults. We considered how they handle furniture, and made our furniture extra strong and safe accordingly. Rounded corners and edges, adaptations in soft plastic and soft edges on the table tops ensure that the furniture is safe for children.

Compartmented drawer and secret box

The compartmented drawer and the one below are lockable together. The practical compartments help to keep things neat and tidy.

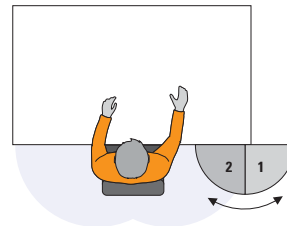

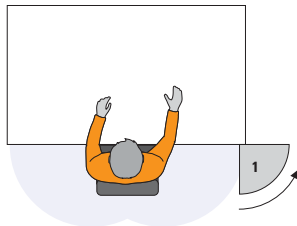

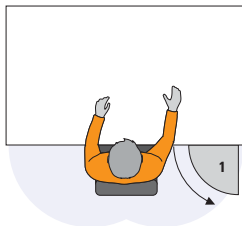

There's another special feature hidden out of sight inside the compartmented drawer: a secret box. This is a very safe hiding place for personal treasures.

Orga-Tool

Swivel utensils compartments with two sliding elements for pens, small objects etc.
Maximum load: 1 kg.

Only for Sprinter.

Innovations

Durable surface

Simply wipe the melamine-resin coated chipboard with a damp cloth and a little mild detergent. Stubborn stains (felt pen) can also be removed with a nitro-based cleanser.

Book holder

The practical book holder is included with every desk.

It is both book holder and timetable with a practical support on the side, plus a drawing template with an integrated reading glass and pen holder.

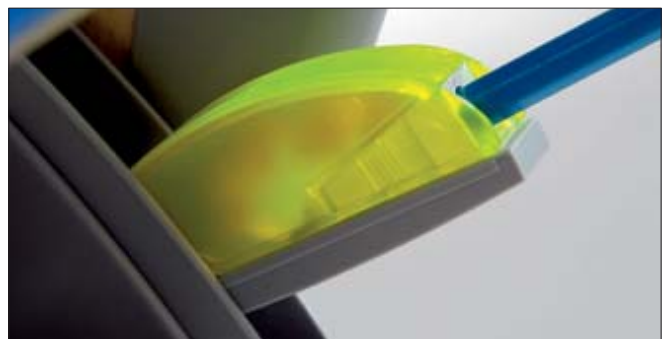

And it can be fixed to the desk so that it works without slipping off, even if the desktop is tilted.

Pencil sharpener and tape dispenser

The compartmented drawer of Booster and Orga-Tool of Sprinter conceal little secrets. These little helpers are not instantly obvious, and can easily be folded down beside the compartmented drawer.

They are simply removed from the holders to fill or empty, and then clipped back into position.

Swing-up keyboard shelf

There is a patented mechanism on the keyboard shelf on computer desks that allows it to swing up in 3 stages until it is on a level with the desk top, which increases the work surface by approx. 30%. This creates a large armrest that is perfect for healthy, relaxed working with plenty of storage space for documents, and maintains the optimum visual distance from the monitor.

Lowerable monitor shelf

The monitor shelf can be lowered in stages in order to guarantee the ergonomically correct viewing angle. The monitor support adjusts on grids to set the requisite viewing distance on all kinds of monitors. Suitable for all types of monitors up to 24".

Cable duct

One particularly practical detail on the computer desks is the cable duct, made of aluminium profiles, which opens out along the whole width of the desk. It will easily accommodate power strips, mains unit and cables - putting an end to tangled cables.

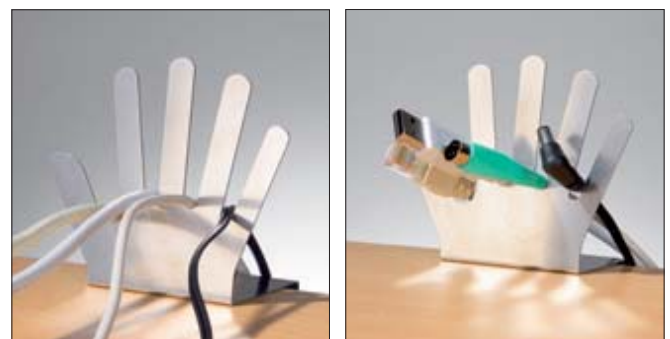

Cable Butler

This plug-in clamp in spring steel will „hold on“ to all the cables that would otherwise criss-cross all over your desk.

As it also prevents unplugged cables from falling down, it is ideal for use with laptops and so is included in the delivery of every „Pro Combi“.

Details

- A Tilttable desktop**
Continuous adjustment up to 30° (p. 8)
- B Anti-slip feature** Desktop
The giant ruler can be adjusted by 90° to keep books and papers in place when the desktop is tilted.
- C Set of drawers**
Can be mounted on the left or right, 2 drawers each with 2 DIN A4 compartments, 1 three-pce. organisation set, 1 compartmented drawer that locks with drawer underneath, collapsible sharpener and tape dispenser, 1 flat pull-out (Paper-Boy).
- D Compartmented drawer**
with a hidden secret box (p. 9)
- E Pencil sharpener and tape dispenser**
Always in their places - these little helpers fold down beside the compartmented drawer.

F Paper-Boy
The flat pull-out for a drawing pad (up to DIN A3 size) hides away almost completely under the drawer element.

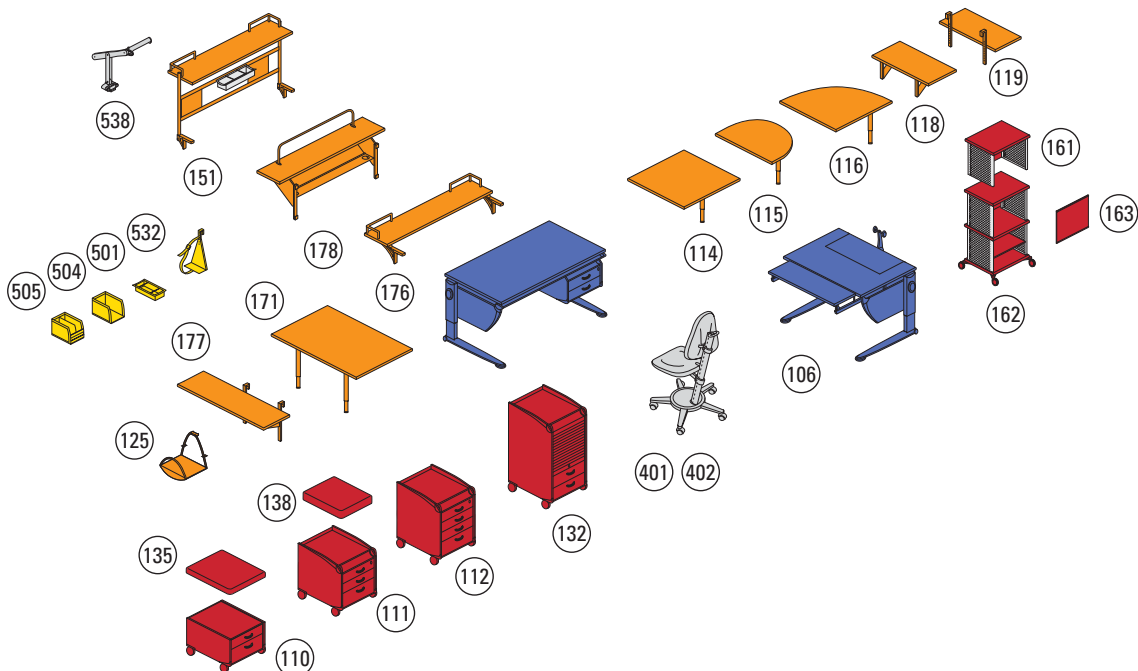

G Book holder and bag hook
(p. 10)

H Colour storage
2 boxes for handles and coloured caps.

Benefits

- **Desk grows with the user**
with footbase Classic, Comfort or Express
- **Ergonomic seating position**
when writing, drawing or reading thanks to the tiltable desktop.
- **Add-on storage space**
with lots of well-planned details and organisation tools for all kinds of writing utensils, from pens to drawing pads.
- **Individual colouring**
Always there for you: two boxes with decorative elements in 7 colours to change whenever you like (coloured caps, handles and key rings). A colour storage in the pen tray makes it easy to change the decorative colour.
- **Child-appropriate shapes**
Rounded corners and edges (p. 8)

Additions for Booster

Details

A Tiltable desktop

Continuous adjustment up to 30°
(p. 8)

B Storage groove

Open groove and anti-slip feature when desktop tilted

C Large drawer

Ultra wide metal drawer, coated, with 2 DIN A4 compartments and 1 DIN A3 compartment for books, notebooks etc. Grooved foam insert for writing and drawing pens and pencils.

D Handle profile with colour memory

Colour memory box

E Sliding armrest

Flexible groove cover with measurement scale, can be used as a ruler and anti-slip feature when the desktop is tilted.

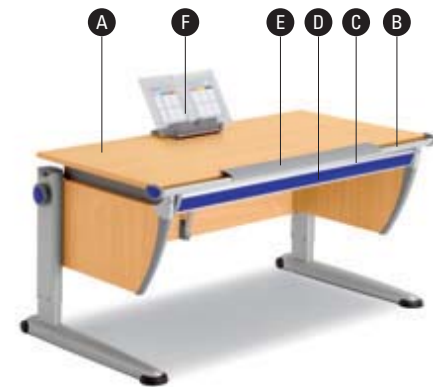

F Book holder and bag hook (p. 10)

Benefits

- **Desk grows with the user** with footbase Classic, Comfort or Express
- **Ergonomic seating position** when writing, drawing or reading thanks to the tiltable desktop.
- **Individual colouring** Always there for you: one box with decorative elements in 7 colours to change whenever you like. A colour storage in the handle profile of the large drawer makes it easy to change the decorative colour.
- **Plenty of leg room** Plenty of leg room even for two people to sit at the table - or for a container underneath it.
- **Child-appropriate shapes** Rounded corners and edges (p. 8)

Details

A Monitor shelf

Size: 65x22 cm

Can be lowered in 3 stages for the correct ergonomic position of the monitor.

B Monitor mount

The mount adjusts on grids to set the ergonomically correct viewing distance on all kinds of monitors.

C Swing-up keyboard shelf

The patented mechanism on the keyboard shelf allows it to swing up in three stages until it is on a level with the desktop.

D Cable duct

Large cable duct made of aluminium profile, opens out for the tidy organisation of power strips, main units and cables and keeps them out of sight.

● Cable Butler

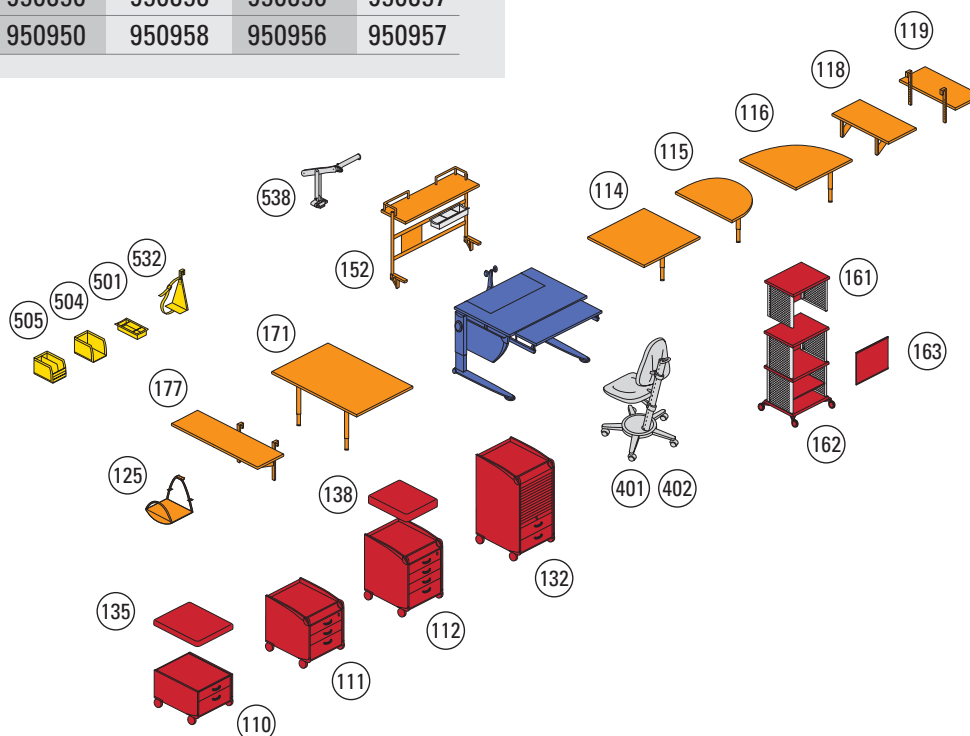

Clamp made of spring steel

Benefits

- **Computer desk that grows with the user**
with feet Classic, Comfort or Express
- **Ergonomic seating position**
when working on the computer by achieving the optimum setting of viewing distance and angle.
- **Relaxed seating position**
The keyboard shelf increases the available workspace by approx. 30%. The resulting large armrest is perfect for healthy and relaxed working with the keyboard and mouse.
- **Individual colouring**
Always there for you: one box with decorative elements in 7 colours to change whenever you like.
- **An end to tangled cables**
The Cable Butler secures loose cables on the desktop and prevents them from falling down.
- **Child-appropriate shapes**
Rounded corners and edges (p. 8)

Additions for Pro Combi

Details

A Blotting pad

made from polycarbonate foil, back-side slightly adheres to the table top. Size 60 x 42 cm

B Decor element for table sides

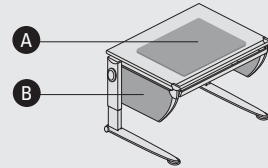

made from polypropylene, redesigns the sides of the table easily. Elements can be added without utilities and be removed without leaving residue.

Not available for Pro Combi!

Benefits

- **Individual design**
Inherently stable and robust design element for supplementary restyling.
- **exchangeable at any time**
if a decor is no longer appealing, it is easily removed or exchanged for a new one.
- **adhesive Blotting pad**
due to its slightly adhesive backside the blotting pad sticks to the desk top, even when it is tilted.

Delivery includes:
1 blotting pad
2 decor elements for table sides

 Walnut

Details

3 drawers on precision runners. Bottom for bulky items H 12.5 cm, top each H 7.5 cm. Removable horizontal dividers, each for 2 compartments (DIN A4).

Compartmented drawer and secret box Hidden out of sight in the compartmented drawer (*p. 11*)

Lock: compartmented and top drawers can be locked together.

4 smooth-running castors, 2 with locks.

Grey colour applications always included.

Accessories: Softpad

Benefits

- **Organisation tool / storage space** to store all kinds of writing utensils beside or under the desk
- **Drinks holder** (integrated in the compartmented drawer)
- **Lockable drawer**
- **extra space-saving** The Medi is 66 cm high and can be parked under the Runner/Sprinter.
- **Seat** The seat pad turns the Medi into a mobile stool - for siblings, or somewhere for a „homework assistant“ to sit.

Applications, handles: Order no.

Maximo Forte

We accept no liability for damage to floors resulting from dirty castors.

Details

A Backrest

Tab+Switch mechanism for simple, safe height adjustment. Backrest oscillates for maximum back support.

B Seat

Quick Lock for safe and easy adjustment of the seat height and depth; buffers for added sitting dynamics and comfort.

C Measurement scale

Measurement scale to set the seat and backrest to suit the user's height.

D Upholstery

Ergonomically shaped clip-on upholstery for dynamic sitting. Patterned and plain covers can be washed at 40°C.

E Secret compartments

to store little secrets.

F Base

Made of plastic, with a large rotating assembly - for stability and easy rotation. Lockable combination castors for hard or soft floors (additional floor mat required if to be used on parquet).

Sturdy construction in coated steel profile and aluminium castings.

G Turn-Stop

The rotating assembly is fixable with the turn stop.

Benefits

Individual seating ergonomics

We are all built differently. Because the seat height and depth, and the height of the backrest can all be adjusted separately, the chair is perfect for accompanying children throughout their growth and development.

- Easy height adjustment of seat and backrest
- Backrest oscillates for maximum back support.
- Seat depth adjustment by telescopic-profile
- Tilting joint for dynamic sitting
- Seat shell with buffer for added sitting comfort

**Height adjustable from
28 - 54 cm**

Maximale capacity: 80 kg

Details

5 glides for the Maximo Forte, slot in to replace the castors. Made of black plastic with a sturdy steel pin. Controls the child's desire for excessive movement. Together with engaged Turn-Stop the chair can be adjusted completely fixed.

Colour	No.
 black	350505

Details

A Swivel joint + reflector

Thanks to its clever swivel joints and 90° reflector it is perfectly suited for customising the illumination of the desktop.

B Installation for right-handed users

Switch on and adjust with your right hand. So that no shadow is thrown by the user's body, and for the correct configuration for right-handed users.

C Installation for left-handed users

Convert for left-handed users in a few easy steps.

D Energy-saving lamp

Low-energy illuminant (11 watt), equates to the output of a 75-watt bulb.

E Ballast

Integrated ballast and weight balance for the reflector 230 V~, 50 Hz, 0.155 A.

F Clamp mount

Thanks to its patented clamp mount, the light can be easily mounted on the desktop/Addition in one easy step, and is also easily moved. Attached to the bottom of the clamp mount: special key to readjust the pivot arm joints.

VDE tested
Protection rating 2

Benefits

- **The non-glare illumination** is child's play to move
- **Suitable for left- or right-handed** individuals

The reflector can be positioned to prevent shadows being cast by the arms and/or bodies of left- or right-handed users.
